

### Step 1

Go to <http://oversea.ikonke.com> to download and install the free Smart K app on your phone or tablet.

Android

iOS

### Step 2

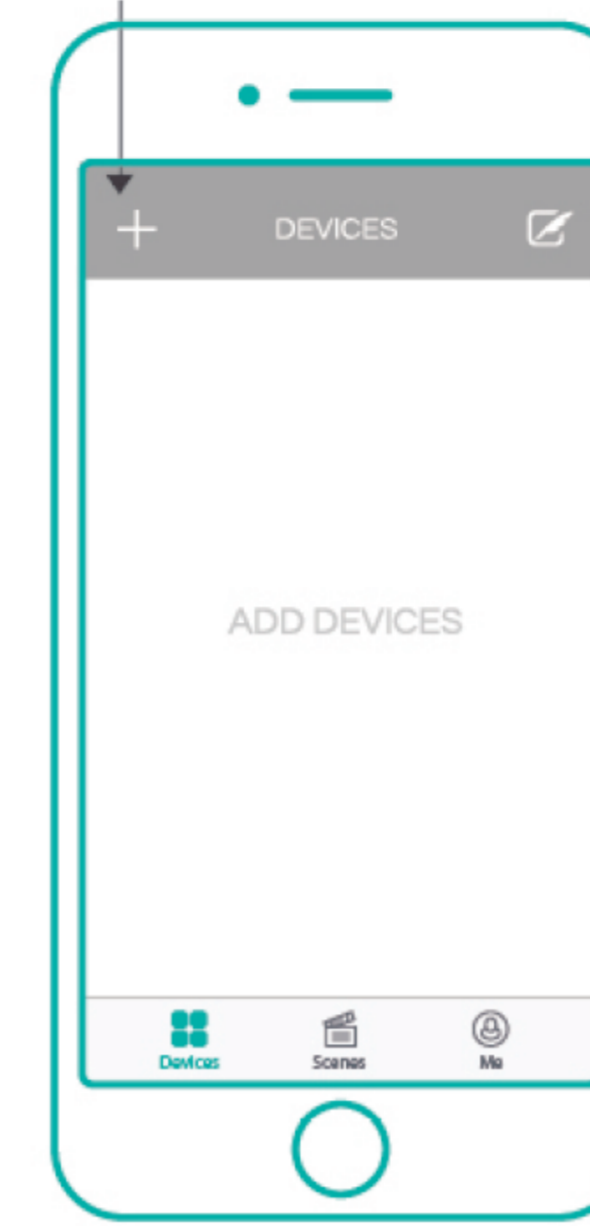

Ensure your phone or tablet and VIS-8003 are connected to the same Wi-Fi network, which must be 2.4 GHZ.

### Step 3

Plug in your VIS-8003 then press and hold the power button for five seconds until you see the flashing blue light. This indicates it is ready for setup.

### Step 4

From the Smart K app, click the "+" icon at the upper left hand corner.

On the next screen, select VIS-8003, enter your Wi-Fi password, and begin setup.

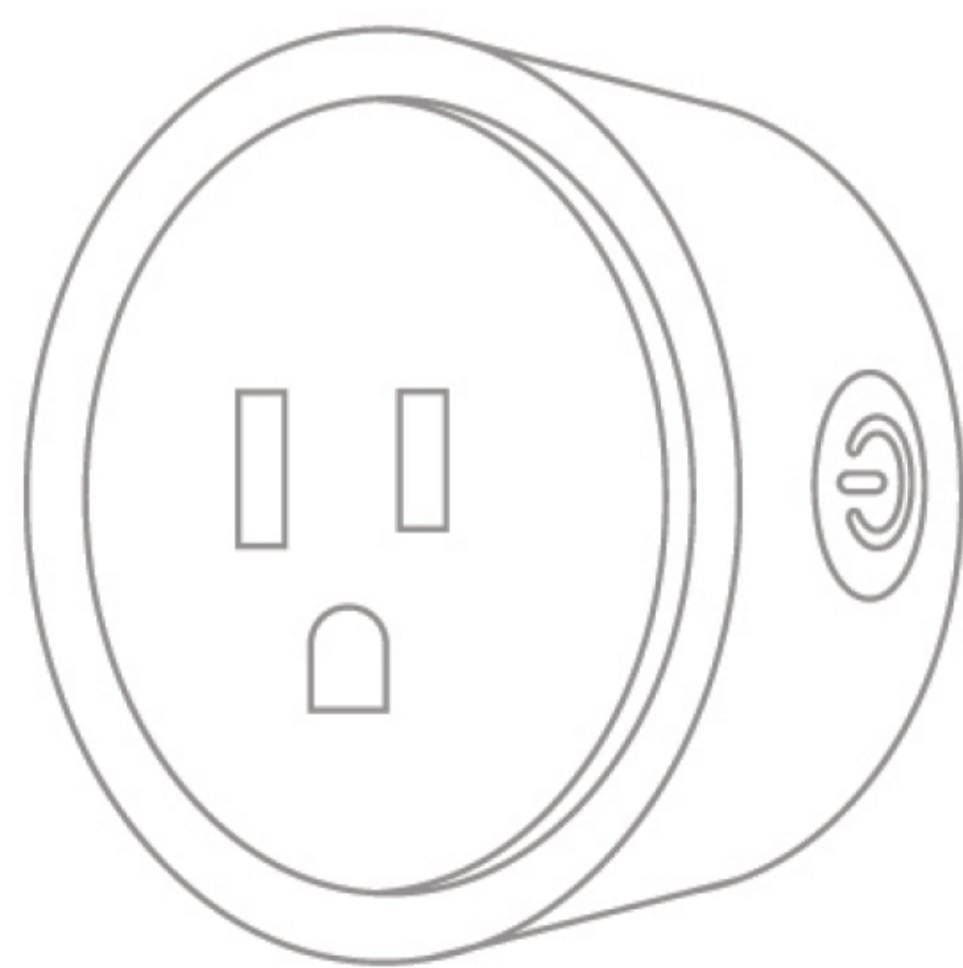

### Step 5

Once setup is complete, the blue light will stop flashing and you will be prompted to create a name for your VIS-8003.

If for some reason the setup fails, reset and repeat the setup process.

### How to Reset Your VIS-8003

When plugged in, press and hold the power button on the side for 5 seconds until the blue light begins flashing. Use the Smart K app to reconfigure the network settings.

### Specifications

AC 120V, 60Hz  
15A  
1800W

(For general use only)

Compact Design

Wi-Fi Enabled

Turns Appliances and Devices On/Off Remotely
