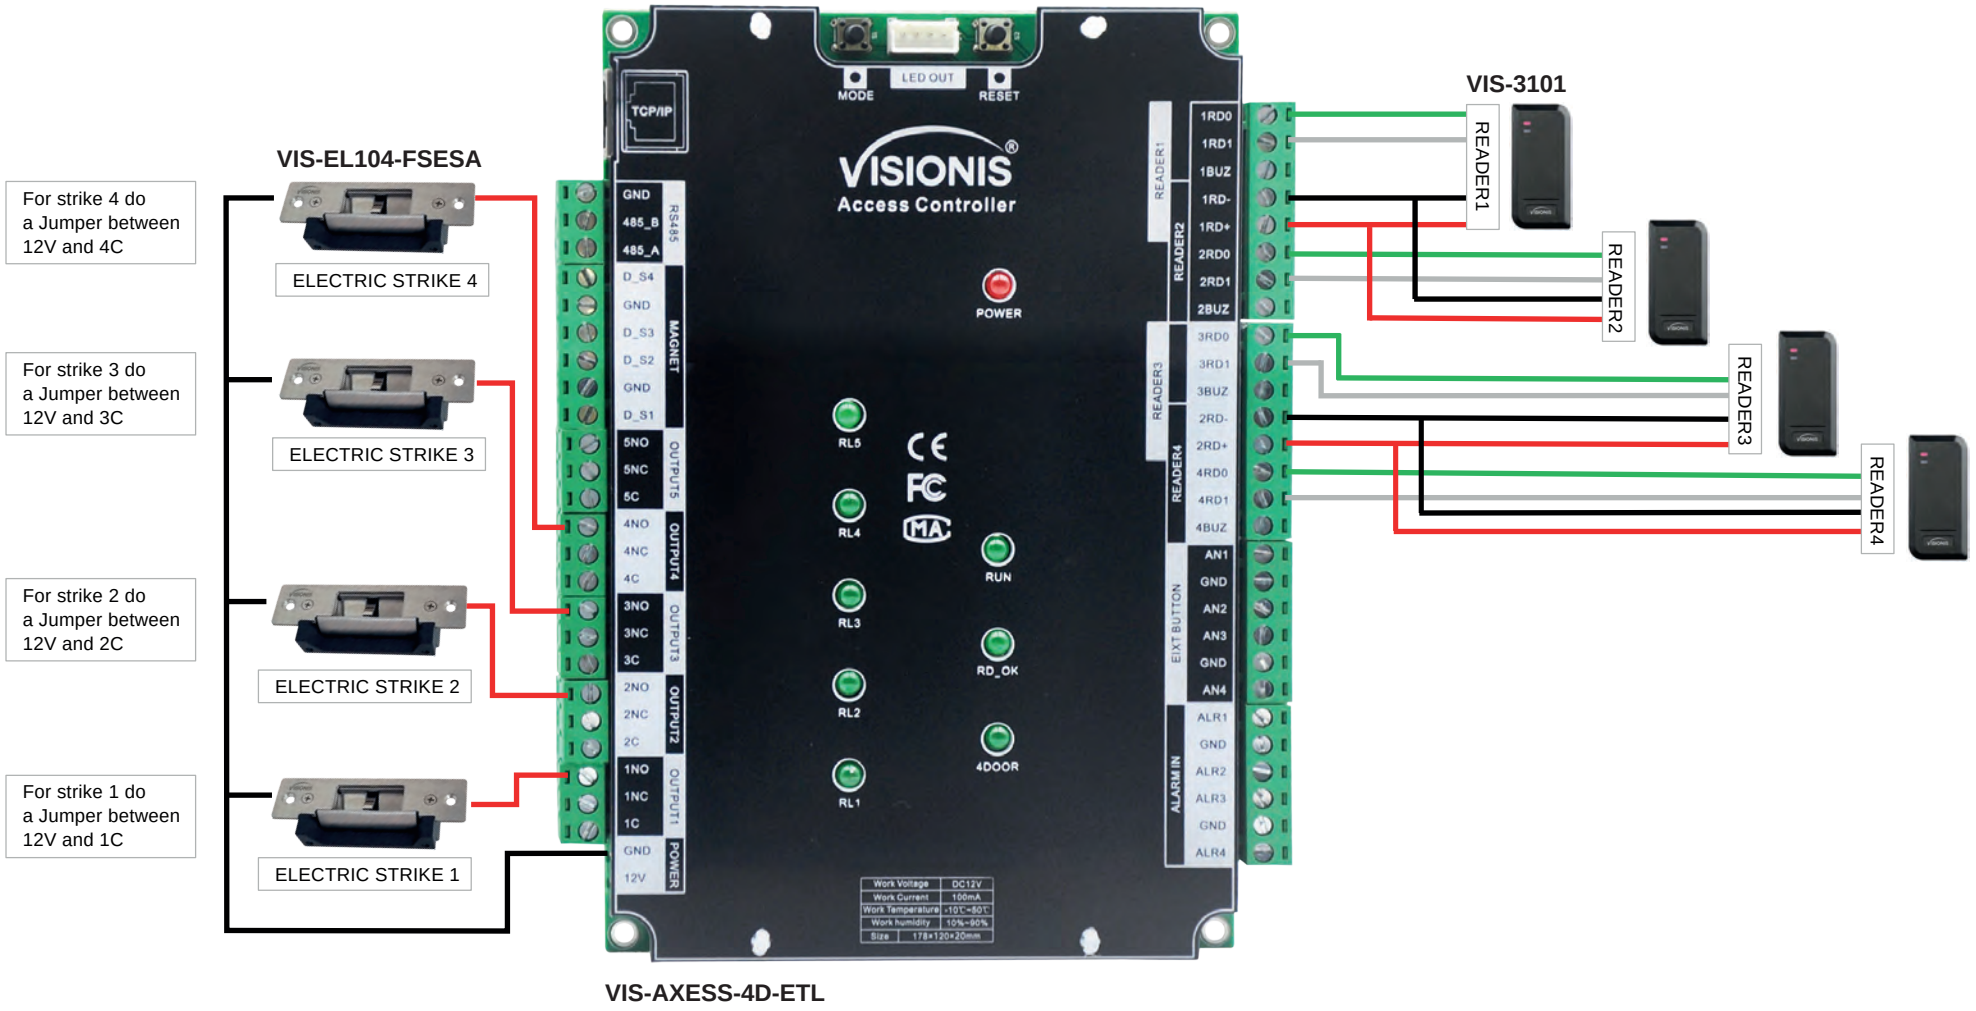
INSTALLATION DIAGRAM FOR ACCESS CONTROLLER, CARD READER, ELECTRIC STRIKE AND EXIT BUTTON KITS

This Diagram is for kits: FPC-6224



ATTENTION! QUICK TIPS, MUST READ BEFORE INSTALLING:

- Make sure to cut off the connectors on both power supplies, then strip the wire leads before installation.
- To properly install this kit, we recommend using 18/2, 18/4, or 20/2, 20/4 gauge wire.
- Before installation, check with your local fire authority for fire code compliance.
- To identify the +, –, NC, NO, or Open contacts on the exit button, please refer to the exit button's manual.
- We are not responsible for improper installation of this kit. This diagram is provided as an example, but actual applications may vary.
- If you are not experienced with electrical components, please consult a certified electrician or locksmith.
- When installing this kit, make sure all components are turned off. We are not responsible for any short circuits.
- Use only the wires shown in the diagram for this application and disregard all others.
